

**X-ray and neutron research on bio-inspired materials
and sustainable energy technology**

September 01-08, 2024
Tomaszowice - Kraków

German-Swedish Röntgen-Ångström-Cluster (RAC)

The **summer school** offers a one-week top-class multidisciplinary program with international lecturers and tutors for master's and diploma students in the final research phase of their study programs, PhD and doctoral students, as well as young postdocs, whose research is connected with the use of X-rays and/or neutrons from these most advanced research infrastructure facilities.

<https://www.rac-school.org/>

The deadline for applications is May 10th, 2024.

The organizers cover the full participation cost.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 871072
